Bilateral Meetings

- Tuesday (09:00 am - 01:30 pm)

Description

Youbiquo is a dynamic Italian company with an international footprint that offers users see-through wearable displays. Founded at the end of 2013 and headed by a team of veterans in new technologies (optics, electronics, mobile) and marketing, Youbiquo has developed its own Smart Glasses, Talens, a fully customizable eyewear equipped with a Personal Assistant Software and 'state of the art' hardware. The components are ready to be used in applications ranging from Maintenance, Repair & Operations assistance to virtual engineering and marketing and more

Technological offer

Smart Glasses and IOT solutions for Operations and Maintenance workflows

Yubiquo enables enterprises to effectively use smart glasses solutions to better their operations workflows. Youbiquo covers the whole wearable technology lifecycle. Industrial Design, Ergonomics, Optics, Electronics and Software are the components to put together for a really useful solution for the workers that can use information critical to their workflow overlaid contextually onto the real world, interact with it in a natural way and

collaborate with their peers.

Youbiquo is offering its state of the art platform to enterprises with important operations use cases: as an example in the maintenance tasks smart glasses can present suggestions to a hands free worker; in the touristic business smart glasses can offer “more than an audio-guide” service.

The platform has several components to plug in different ways to fulfil tasks like objects and image recognition, video recording and sharing.

We are looking for organizations that imagine a more effective workflow based on smart glasses technologies. As first examples logistics, avionics and safety production cycles are contexts where such tools offer a good return on investments.

We offer technical and outsourcing cooperation as well manufacturing agreement, while we request cooperation mainly in sales / distribution and investment/financing.

Keywords: IOT Smart Glasses Smart Tourism Operations Maintenance avionics logistics quality check
Cooperation Offered

1. Outsourcing co-operation
2. Technical co-operation
3. Manufacturing agreement
4. Sales / Distribution
5. Investment/Financing

Cooperation Requested

1. Outsourcing co-operation
2. Technical co-operation
